

BONNET

ADVANCIA
MODULAR COOKING EQUIPMENT

TECHNOLOGICAL ADVANCE FOR THE BENEFIT OF CHEFS

For over 100 years **BONNET** has worked in close collaboration with Chefs

Together we develop solutions to suit every kitchen, each culture, by blending know-how with advanced technology

It is in this spirit that we imagined **ADVANCIA**

Designed and manufactured in France this new range offers flexibility and multiple configurations to meet the needs of the most demanding Chefs

ADVANCIA

- 2012** Launch of the new **ADVANCIA** range
- 1982** Design of **BONNET**'s first range of modular cooking equipment
- 1966** **BONNET** extends its know-how in the field of cooking
- 1830** Enterprise founded by **NICOLAS BONNET** in the field of mechanical construction in the Lyonnais region

THE NEEDS OF PROFESSIONALS

Why hesitate between two ranges when **ADVANCIA** offers you all the possibilities ?

For your cooking suite you can combine **ADVANCIA** with modules of **ADVANCIA PLUS**

While **ADVANCIA** brings you the indispensable, **ADVANCIA PLUS** modules offer a multitude of possible uses

GREATER COMFORT
INCREASED OUTPUT
MORE PERFORMANCE
IMPROVED CONSISTENCY

ADAPTABILITY

With more than 300 modules the **ADVANCIA** range offers you the possibility to create your personal cooking suite, meeting your needs, your requirements, your desires

Design your cooking suite so that it becomes a reflection of your menu

Assemble your modules as you would marry flavours

ROBUST AND RELIABLE

3 mm Top

A **3 mm** thick top meets your requirement for robustness

The one piece structure, cut by laser, was specifically designed to eliminate any form of distortion due to heat

Modules are designed from the start to reduce wear, improve resistance and ensure long term reliability

ADVANCIA EFFICIENCY ACROSS THE BOARD

PERFORMANCE

All **ADVANCIA** modules incorporate **FPS** [FullPowerSystem™] technology and are designed to meet the highest demands and level of output

From the bi-metal base in the bratt pan to the ceramic radiant burner in the fryer or even the temperature gradient of the planchas, the **FPS** adapts to each module

COMFORT

Because it is important to keep equipment operating just as it did on day one, **ADVANCIA** has been designed to be even **EASIER TO CLEAN**

Smooth surfaces, squares edges, flush plates to eliminate dirt traps

Channels and water baths to allow for grease collection

Components that are completely removable to facilitate access

SIMPLICITY FLEXIBILITY SAFETY SUITABILITY **OUTPUT**
 HYGIENE SOLIDITY ENVIRONEMENT EASE OF CLEANING QUALITY
EFFICIENCY ESTHETIC SOLUTION LIBERTY EXCELLENCE
 PRODUCTIVITY ERGONOMICS **VERSATILITY** EVOLUTION
 ADVANCIA 7

ADVANCIA

FOR ALL WORKING ENVIRONMENTS,
FROM THE CONSTRAINED TO THE MOST SPACIOUS

ADVANCIA

FOR THE ENTIRE SPECTRUM OF RESTAURANTS

NO MATTER WHAT YOUR DESIRES AND YOUR NEEDS
ADVANCIA INTEGRATES INTO YOUR PROJECT

A MULTITUDE OF SOLUTIONS

DOUBLE SIDED SUITE

Gain in performance without increasing the size of your equipment

A simple and economic solution

WALL SUITE

ALL **ADVANCIA** SUITES ARE AVAILABLE ON LEGS, ON A CONCRETE PLINTH, WITH OR WITHOUT KICK PLATES AND AS CANTILEVERED UNITS

iTop

From dream to reality
One piece 4mm thick,
one piece control fascia,
one piece chassis...

Increase the accessibility to your modules

iTop, CENTRAL ISLAND SUITE

Improved working ergonomics without compromising storage and cooking space

iTop, BRIDGING SUITE

OPEN BURNERS PLUS

PERFORMANCE

- Because all your pans are different sizes and to retain the best output **ADVANCIA PLUS** open burners incorporate **CloseContactPlus™** technology: These patented horizontal flame burners guarantee between 50 and 60% efficiency whether low or full flame

CloseContactPlus™ Technology

COMFORT

- Save time with pilot and protected electric ignition as standard
- Optimised work surface: over 20 cm at the front dedicated to the plating of your dishes

EASY TO CLEAN

- Cut your cleaning time by a factor of 5! The patented burners are completely removable by hand for fast and effective cleaning
- Grease splashes are eliminated instantly thanks to a water bath with assisted regeneration plumbed to waste or to an independent collector

OPEN BURNERS

PERFORMANCE

- Chromed brass burner with horizontal flame

EASY TO CLEAN

- Pressed container with drain outlet at the front: Conforms to current hygiene standards

- Serves as a waterbath: Halves cleaning time

Before each service turn on the water supply to the open burners to avoid burnt on grease

GAS SOLID TOP PLUS

3 mm Top

FlushTop

FullPowerSystem

CleaningSystem Plus

Start&Cook

PERFORMANCE

- Increase your productivity, a single unit for simmering and full on heating at the same time!

Benefit from a greater temperature gradient, from 150 to 500°C and an optimum output from a micro perforated stainless burner (1000 width version)

TEMPERATURE GRADIENT

COMFORT

- Save time with electric spark ignition as standard: lit with a single movement

EASY TO CLEAN

- A cooking surface which is flush with the worktop

GAS SOLID TOP

3 mm Top

EasyCleaningSystem

Start&Cook

PERFORMANCE

- All types of heating are possible from simmering to full power
- Heat distribution is optimised by the cast iron plate itself

COMFORT

- Electric spark ignition as standard

EASY TO CLEAN

- Plate is flush with the worktop

OPEN BURNERS & GAS SOLID TOP ON OVEN PLUS

Responds to 50% of your requirements with a single module: gain space, make savings

3 mm Top

FlushTop

FullPowerSystem

CleaningSystem Plus

Start&Cook

CloseContact Plus

AirFlexSystem

PERFORMANCE

- Even cooking and browning: The AirFlexSystem™ technology increases cooking possibilities tenfold by improving convection within a gas oven so that up to 3 levels can be cooked at once
- Double your production thanks to an oven cavity that is GN2/1 size

COMFORT

- Dispense with superfluous and constraining actions with electric spark ignition and a pilot light
- Increase your cooking area and keep your plating area close at hand thanks to squared side edges

SAFETY

- Integral hinges improve the longevity of your equipment
- No risk of burning yourself on the ergonomic handles

OPEN BURNERS & GAS SOLID TOP ON OVEN

3 mm Top

EasyCleaningSystem

Start&Cook

CloseContact

AirFlexSystem

PERFORMANCE

- Large cooking capacity: GN2/1 oven
- Integral AirFlexSystem™ technology

COMFORT

- Electric spark ignition
- Control via a gas valve with pilot
- Ergonomic handles

INDUCTION HOB PLUS

PERFORMANCE

- Reduce heating time by a factor of 3 thanks to large double hobs each of 5 kW
- Consume only the energy actually required for both large and small pans

COMFORT

- Work serenely without excessive heat being given off; induction only starts when there is a pan present

SAFETY

- No risk of liquid penetration : The design of the one piece top with high resistance vitroceramic plate ensures the module is completely sealed

EASY TO CLEAN

- By eliminating ingress Induction becomes the smoothest module
- Any grease escaping during cooking doesn't burn onto the edges, a quick wipe with a sponge and your hob is clean

ECONOMICAL

- More than 90% of the energy consumed is used to cook the product, no unnecessary expense!
- The moment the pan is removed from the hob the power is switched off

Reduce your energy consumption by over 60%

ADVANCIA PLUS induction is designed to function for long times in extreme conditions

ELECTRIC SOLID TOP PLUS

A real solid top that's electric

PERFORMANCE

- Thanks to the 2 or 4 independent hobs, depending on the model, select the settings you need: from all solid top (over 450°C) to all simmering, or a mixture of the two

EASY TO CLEAN

- All ADVANCIA PLUS solid tops are flush with the worktop and surrounded by a channel fitted with a drain that can be plumbed to waste or directed into an independent container

A setting specially developed to improve the longevity of the equipment

CHAR GRILL PLUS

PERFORMANCE

Perfect results from when service starts until it finishes

- Radiant cooking allows consistent output
 - Without changing the setting
 - No matter how many grilling are done

EASY TO CLEAN

- By-products are continuously eliminated

ELECTRIC SOLID TOP

A concentration of performance in a compact module

- 2 or 4 independent heating zones

PLANCHA PLUS

3 mm Top

FlushTop

FullPowerSystem

CleaningSystem PLUS

Start&Cook

ROBUSTNESS

- The design of the electric planchas incorporates a group of armoured elements pressed against the plate and protected within an insulated stainless box
- All planchas are fitted with a specific temperature regulator. The risk of overheating is eliminated, your equipment will last even longer

A cooking surface regulated to maintain an identical temperature whether the plancha is in use or not without deforming the plate in the long term

PERFORMANCE

- All 600 **ADVANCIA PLUS** planchas have a temperature gradient which provides a higher cooking temperature in the center
- This technology, unique in the market, responds to your need to precisely control the degree of cooking
- A moistness from the outside to the core of the product
- High output guaranteed throughout service

TEMPERATURE GRADIENT

Channel with water supply

- All **ADVANCIA PLUS** planchas both gas and electric are temperature regulated with 2 independent zones on the wider units

- A multitude of surfaces to respond to your needs :
- Martin steel or hard chrome
- smooth or ribbed

- The thickness of 16mm avoids premature deterioration of the cooking plate

Brown the fish then move it to the edge to finish cooking it gently or to bring it back to temperature without burning yourself (600 version)

PLANCHA

PERFORMANCE

- An optimised cooking surface, particularly suited to a small work area
- 2 independent control zones on 800 wide planchas
- The Martin steel cooking surface can be adjusted from 100 to almost 300°C

3 mm Top

FlushTop

EasyCleaningSystem

Start&Cook

ROBUSTNESS

- A group of armoured elements pressed against the plate and protected within an insulated stainless box (for the electric planchas)
- Planchas are fitted with a temperature regulator. The risk of overheating is eliminated; your equipment will last even longer

COMFORT

- Low heat emission from a chrome* plancha

EASY TO CLEAN

- Cooking by-products and wash water are recovered in a swivel container in the fascia
- Side splash guards are standard

BRATT PAN PLUS

PERFORMANCE

Your meat is perfectly browned everyday

- Thanks to integral sensors in the base of the well, the **CoreControl™** technology automatically adjusts the heating power and regulates the temperature to suit the type of product being cooked

Healthier cooking

- The 15 mm thick bimetallic base guarantees a flat cooking surface so that a little oil spreads evenly all over it

Save energy

- The integral regulation drops energy consumption by 15%

Reduce the required floor space

- Triple function: bratt pan, boiling pan and braising pan

COMFORT

- All **ADVANCIA PLUS** bratt pans are fitted with **Start&Cook™** technology. Ignition is automatic
- Don't tire your back any longer thanks to the **standard electric tilt**
- Automatic water delivery to cook your rice or deglaze your sauces
- A cooking surface adapted to your production : choose between 95 and 140 liters

EASY TO CLEAN

- A totally enclosed well prevents any water getting onto the heating system
- When frying all grease splashes are collected and discharged via a peripheral channel

Make cleaning between batches easier with the standard retractable spray hose

Core probe

Ensure your pasta cooking without oxidising the bi metallic well base
Cooked to perfection thanks to the standard core probe

Automatic fault detection with error code display to rapidly identify the cause of the problem

BRATT PAN

PERFORMANCE

- Integral **CoreControl™** technology for precise control of temperature and cooking speed
- Triple function: bratt pan, boiling pan and braising pan
- **Start&Cook™** technology: Electric spark ignition as standard

COMFORT

- Integral water supply as standard
- Electric tilt available
- Capacity : 80, 95 or 140 liters

FRYER

PERFORMANCE

- Prolong the service life of your oil whilst consuming 15% less energy: each fryer is fitted with an electronic control allowing solid oil melt and limiting inappropriate increases in temperature
- Your cooking rate is assured throughout service by a gas control unit acting on two high output micro perforated burners (on gas models)

SAFETY

- Use the **ADVANCIA** fryers in complete safety thanks to a thermostat limiting the temperature to 210°C

COMFORT

- Lighting any of the **ADVANCIA** gas fryers is facilitated by **Start&Cook™** technology with electric spark ignition as standard
- Select your fryer from a large range, from the smallest capacity of 2 x 6 litres up to 25 litre units assembled in a battery to cook from 15 to 250 kgs of chips per hour
- Gain time and optimise your cooking with automatic basket lift (optional)
- Save on space: all the performance of the fryers in a compact 400 module

A high output fryer for the most demanding Chef: IR25G: a 25 litre gas fryer with radiant burners and ionisation flame control for increased output

All 18 and 25 litre fryers can be fitted with an integral filtration system. This is kept operational by a blown air heating system in the piping which can even melt solidified oils

BAIN-MARIE PLUS

COMFORT

- Simplify your life thanks to a water supply to the base of the well
- Use your bain-marie whilst dressing your plates: optimise your space thanks to a half cover fitting flush with the worktop

EASY TO CLEAN

- Save time when cleaning
- The **ADVANCIA PLUS** bain-marie has a well that is fixed to the underside to eliminate any unevenness
- The unit can be plumbed to waste or into an independent container

BOILING PAN

COMFORT

- Boiling pans from 60 to 250 litres, direct heat or bain marie in gas or electric
- Pressed 316 L stainless steel base
- Standard integral water tap
- Automatic fill of double jacket

EASY TO CLEAN

- Fixed boiling pan limits the surfaces to be cleaned

BOILING PAN PLUS

PERFORMANCE

- Even faster temperature increase with two high output micro perforated burners on gas models
- Cooking that takes care of your products through indirect heat

COMFORT

- A boiling pan suited to high production with a usable capacity of 200 litres
- Improving your working comfort with standard electric tilt
- Available with a socket outlet on the fascia

ADAPTABILITY OF THE ADVANCIA RANGE

ADVANCIA offers you a global solution, with the option to combine the majority of cooking units with refrigeration below

- Gain space
- Optimisation of service

A refrigerated unit designed for frequent door opening throughout service. Its insulation and its energy performance guarantees that the chill chain is respected

Adapt the module to your environment :

- With or without compressor
- With cupboards or drawers

EASE OF MAINTENANCE

ADVANCIA modules were designed to be easy to maintain

- An access panel in the back of units that are connected to water for easy access to the drain
- Simplified access to components with a hinged system for the fascia panels
- Automatic visual fault display on fryers and bratt pans

ECOLOGY, ECONOMY

ECO DESIGN

During construction, the laser cutting and welding technology reduces material wastage and eliminates the need to polish, with all its negative effects not least the unpleasantness of the task and dust projection to the atmosphere

CARBON FOOTPRINT

The standard integral electronic regulation into all the bratt pans and all planchas reduces energy costs by at least 15%

Moreover the fryer regulation guarantees optimum oil use and improves its longevity

The **CloseContact™** technology allows an output of **60%** to be obtained on open burners for optimised energy consumption

RECYCLING

Recyclable materials used (metal, plastics, packaging wood, new lead free electronic circuit boards) comprise over **95%** of the total mass of these products

PROFIT FROM YOUR INVESTMENT
