Alto-Shaam 24/7 Emergency Repair Service

Call	Call 800-558-8744 to reach our 24-hour emergency service call center for immediate access to local authorized service agencies outside standard business hours. The emergency service access is provided exclusively for Alto-Shaam equipment and is available throughout the United States through Alto-Shaam's toll free number.
Availability	Emergency service access is available seven days a week, including holidays.

TABLE OF CONTENTS

The Meaning of Signal Words

This manual contains signal words where needed. These signal words must be obeyed to reduce the risk of death, personal injury, or equipment damage. The meaning of these signal words is explained below.

**DANGER**

Danger indicates a hazardous situation which, if not avoided, will result in serious injury or death.

**WARNING**

Warning indicates a hazardous situation which, if not avoided, could result in serious injury or death.

**CAUTION**

Caution indicates a hazardous situation which, if not avoided, could result in minor or moderate injury.

NOTICE

Notice indicates a situation which, if not avoided, could result in property damage.

NOTE: Note indicates additional information that is important to a concept or procedure.

Safety Precautions

Before you begin

Read and understand all instructions in this manual.

Electrical precautions

Obey these electrical precautions when using the appliance:

- Connect the appliance to a properly grounded outlet. Do not use the appliance if it is not properly grounded. Consult an electrician if there is any doubt that the outlet used is properly grounded.
 - Keep the cord away from hot surfaces.
 - Do not attempt to service the appliance or its cord and plug.
 - Do not operate the appliance if it has a damaged cord or plug.
 - Do not immerse the cord or plug in water.
 - Do not let the cord hang over the edge of a table or counter.
 - Do not use an extension cord.
-

Usage precautions

Obey these usage precautions when using the appliance:

- Only use this appliance for its intended use of heating or cooking.
 - Always keep liquids, or foods that can become liquid when heated, level and at or below eye level where they can be seen.
 - Always open the appliance door very slowly. Escaping hot vapors or steam can cause serious injury.
 - Use utensils and protective clothing such as dry oven mitts when loading and unloading the appliance.
 - Use caution when using the appliance. Floors adjacent to the appliance may become slippery.
 - Do not cover or block any of the openings of this appliance.
 - Do not cover shelves or any other part of this appliance with metal foil.
 - Do not use this appliance near water such as a sink, in a wet location, near a swimming pool, or similar locations.
-

Maintenance precautions

Obey these maintenance precautions when maintaining the appliance:

- Obey precautions in the manual, on tags, and on labels attached to or shipped with the appliance.
- Only clean the appliance when the oven is disconnected from the power source.
- Do not store the appliance outdoors.
- Do not clean the appliance with metal scouring pads.
- Do not use corrosive chemicals when cleaning the appliance.
- Do not use a hose or water jet to clean the appliance.
- Do not use the appliance cavity for storage.
- Do not leave flammable materials, cooking utensils, or food inside the appliance when it is not in use.

Continued on next page

Continued from previous page

Operator training

All personnel using the appliance must have proper operator training. Before using the appliance:

- Read and understand the operating instructions contained in all the documentation delivered with the appliance.
- Know the location and proper use of all controls.
- Keep this manual and all supplied instructions, diagrams, schematics, parts lists, notices, and labels with the appliance if the appliance is sold or moved to another location.
- Contact Alto-Shaam for additional training if needed.

Operator qualifications

Only trained personnel with the following operator qualifications are permitted to use the appliance:

- Have received proper instruction on how to use the appliance.
- Have demonstrated their ability with commercial kitchens and commercial appliances.

The appliance must not be used by:

- Persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision concerning use of the appliance by person responsible for their safety.
- People impaired by drugs or alcohol.

- Children should be supervised to ensure that they do not play with the appliance.
- Children shall neither clean nor maintain the appliance.

Condition of appliance

Only use the appliance when:

- All controls operate correctly.
- The appliance is installed correctly.
- The appliance is clean.
- The appliance labels are legible.

Servicing the appliance

- Only trained personnel are permitted to service or repair the appliance. Repairs that are not performed by an authorized service partner or trained technician will void the warranty and relieve Alto-Shaam of all liability.
- To prevent serious injury, death or property damage, have the appliance inspected and serviced at least every twelve (12) months by an authorized service partner or trained technician.
- Contact Alto-Shaam for the authorized service partner in your area.

Continued on next page

Continued from previous page

Personal Protective Equipment (PPE)

Wear the following Personal Protective Equipment (PPE) while cleaning the appliance:

- Protective gloves
 - Protective clothing
 - Eye protection
 - Face protection
-

Use of restraining devices

A restraining device (tether) must be installed to any appliance that is hard-wired and mounted on casters. The tether must:

- Be secured to the building's structure.
- Limit the movement of the appliance so that no stress is transmitted to the electrical conduit.

A connection point for the tether is located on the back of the appliance.

A tether is not supplied by nor available from the manufacturer.

Service Technician Training

Only trained personnel are permitted to service or repair the appliance. Service technicians must be knowledgeable in current codes and standards as stated by the appropriate agencies, such as:

- The National Fire Protection Association (NFPA)
- National Electrical Code (NEC)
- The Service Technician's employer

Control Identification

TH-TS-008703

Item	Description	Function
1	Power icon	Touch to turn on or turn off the oven.
2	Cook icon	Touch to set cook temperature.
3	Time icon	Touch to cook by time.
4	Probe icon	Touch to cook by probe.
5	Hold icon	Touch to set hold temperature.
6	Smoke icon (Ovens with smoker option only)	Touch to set smoke time.
7	Start icon	Touch to start cook, hold, or smoke function. Touch and hold to stop the current oven function.
8	LCD Display	Displays time, temperature, settings, and error codes.
9	Knob	Used to set or confirm time, temperature, or change settings. Press and hold to access the Settings menu.

How to Turn On and Turn Off the Oven

Before you begin

The oven must be connected to electric power.

Turning the oven on or off

To turn on and off the oven, do the following.

Step	Action
1.	<p>Touch the power icon ① to turn on the oven.</p>  <p style="text-align: right; font-size: small;">TH-TS-008711</p>
2.	<p>Touch and hold the power icon ① for at least 5 seconds to turn off the oven.</p>

Result

The oven is turned on or off.

How to Update Software with a USB Drive

Before you begin

- You will need a USB drive loaded with the software update.
- Make sure the oven is on, but is not in cooking or holding mode.
- Record the versions of the software loaded to the oven. See topic *How to View the Software Versions*.

Procedure

To update the software, do the following.

Step	Action
1.	<p>Plug the USB drive into the port ①.</p>  <p style="text-align: right;"><small>TH-TS-009797</small></p>
2.	<p>Press and hold the knob to access the settings menu.</p>  <p style="text-align: right;"><small>TH-TS-008727</small></p>
3.	<p>Turn the knob until the control displays USB.</p> <p>Press the knob to access the USB menu.</p>  <p style="text-align: right;"><small>TH-TS-009799</small></p>

Continued on next page

Continued from previous page

4. **Turn** the knob until the control displays “Prog”.

Press the knob to select “Prog”.

5. **Turn** the knob to “yes”.

Press the knob to select “yes” and begin the update.

The control will count up to 99, flash the software version, then count up to 99 again.

The control will display “done” when the software has been updated. Touch the power icon to resume operation.

6. **Remove** the USB drive.

Result

The software has been updated.

As an alternative to using the “Prog” function, software can also be updated by doing the following:

- Turn off the breaker on the back, or unplug the oven.
- Plug the USB drive into the port on the side of the oven.
- Turn on the breaker on the back, or plug the oven back in.

The software will update automatically.

Do not remove the USB drive until the update is complete.

How to View the Software Versions

Procedure

To view the software versions, do the following.

Step	Action
1.	Remove and reapply electrical power from the oven.
	<p>NOTE: For TH-300 ovens, the power switch can be used.</p>  <p>TH-TS-011359</p>
2.	The interface board (IB) software version displays. Record this number.
	 <p>TH-TS-011061</p> <p>The control board (CB) software version displays. The numbers to the left of the colon ":" display in HEX format. Record this number.</p> <p>NOTE: A CB version of 1.11 would be represented as 1:11, while a version of 111.11 would be represented as 6F:11. The numbers to the right of the colon ":" are not in HEX format.</p>  <p>TH-TS-011064</p>

- Remove** and reapply electrical power from the oven.

NOTE: For TH-300 ovens, the power switch can be used.

300-TH

TH-TS-011359

- The interface board (IB) software version displays. **Record** this number.

TH-TS-011061

The control board (CB) software version displays. The numbers to the left of the colon ":" display in HEX format. Record this number.

NOTE: A CB version of 1.11 would be represented as 1:11, while a version of 111.11 would be represented as 6F:11. The numbers to the right of the colon ":" are not in HEX format.

TH-TS-011064

Continued on next page

Continued from previous page

3. Power failure (PF) displays.

Touch the power icon to clear the power failure (PF).

TH-TS-011070

4. The display will go blank. **Touch** the power icon.

TH-TS-011073

The display will power up and the icons display.

TH-TS-011076

Result

The software versions have now been viewed.

Maintenance Schedule

Requirements

- See topic *How to Clean the Oven*.
- Make sure the oven is cooled down and off—inside of chamber 140°F (60°C) or less.

Daily

For daily maintenance, do the following.

- See topic *How to Clean the Oven*, and follow the Daily Cleaning procedure.
- **Check** the screen for cracking or peeling. Contact Technical Service if needed.

Weekly

For weekly maintenance, do the following.

- See topic *How to Clean the Oven*, and follow the Weekly Cleaning procedure.
- **Check** the oven for any damage or loose parts.

Monthly

For monthly maintenance, do the following.

- **Inspect** door gasket.
- **Inspect** door window gasket for proper seal.
- **Inspect** cavity door vent slides for proper operation.
- **Inspect** side racks, shelves, and shelf supports for damage.
- **Calibrate** the removable product probe (if applicable)
- **Clean** the cooling fan intake area and exhaust vents.
- **Inspect** door handle screws and tighten if necessary.
- **Inspect** the smoke element (if applicable). If any deformation, cracks or breaks are seen, remove the oven from service and contact a factory authorized service technician.

Yearly

For yearly maintenance, do the following.

NOTE: Must be performed by a qualified professional.

- **Check and tighten** all wire connections.
- **Inspect** the smoke element and smoke element wiring.
- **Measure** the current draw of each cavity. Operate with smoker on if applicable.
- **Test** the heating elements for electrical short to ground.
- **Inspect** the condition of the cord and plug.

Continued on next page

Continued from previous page

- **Check and tighten** the cord connection inside of the appliance control area.
 - **Inspect** the control cooling fans (if applicable).
 - **Measure** the site voltage.
 - **Inspect and adjust** voltage monitor board if needed.
 - **Inspect** and test the product probe and product probe receptacle.
 - **Inspect** and test the control and control functions.
-
- **Inspect** the cavity for structural integrity.
 - **Inspect** the door gaskets for correct shape and seal. Replace/repair as needed.
 - **Inspect** the door handle and hinges. Replace/repair as needed.
 - **Inspect** the full perimeter bumper.
 - **Inspect** the casters.
 - **Do** a cavity temperature calibration procedure per manufacturer's recommendations.

How to Clean the Oven

Before you begin

WARNING: Electric shock hazard.

Set the power switch to the OFF position and unplug the oven before cleaning it.

CAUTION: Burn hazard.

Allow the oven, drip pans, and racks to cool before cleaning.

CAUTION: Corrosive materials hazard.

Wear eye protection and hand protection when cleaning.

NOTICE

Using improper cleaning procedures will damage the oven and void the warranty.

Only use spray cleaner when the electric power is completely removed from the oven.

Do not use steel pads, wire brushes, or scrapers when cleaning.

Daily cleaning procedure

To clean the oven daily, do the following.

Step	Action
1.	Make sure the oven is turned off and cool—cavity is less than 140°F (60°C).
2.	Remove any all detachable items such as wire shelves, side racks, drip pan, and drip tray and clean these items separately.
3.	Remove any spills with disposable paper wipes or a damp cloth.
4.	Wipe the outside of the oven and the drip tray holder with a damp cloth.
5.	Wipe the control panel, door vents, door handles and door gaskets with a non-abrasive nylon scrub pad.
6.	If oven has an optional glass door, clean each side of the window pane with an all-purpose glass cleaner.
7.	Wipe probe, cable assembly, and probe prongs with a non-abrasive nylon scrub pad. Wipe probes with disposable alcohol pad or sanitizing solution recommended for food contact surfaces.
8.	Wipe the outside of the oven with a stainless steel cleaner.

Continued on next page

Continued from previous page

Weekly cleaning procedure

To clean the oven weekly, do the following.

Step	Action
1.	Set the power switch to the OFF position and unplug the appliance.
2.	Wipe the exterior areas of the oven with a non-abrasive nylon scrub pad.
3.	Spray the exterior areas of the oven with stainless steel polish. <div style="border: 1px solid blue; padding: 5px; margin-top: 10px;"> <p>NOTICE Use only non-caustic cleaners. Do not spray directly into the fan openings on the back of the oven. Do not use cleaners that contain sodium hydroxide (lye) or phosphorus.</p> </div>
4.	Spray the interior areas of the oven with oven cleaner. Let the cleaner work for 3–5 minutes.
5.	Wipe the interior of the oven with a non-abrasive nylon scrub pad.
6.	Clean the door gasket with a warm water and detergent solution.
7.	If oven has an optional glass door, clean each side of the window pane with an all-purpose glass cleaner.
8.	Plug the appliance in and set the power switch to the ON position when complete.

Result

The oven is now clean.

Error Codes

Code	Description	Cause	Remedy
ProG	Programmer error	Fatal error	Call Alto-Shaam technical support.
P111	Probe 1 open circuit, upper compartment	Open circuit detected on sensor wires.	1. Sensor connection 2. Sensor 3. Control Board
P110	Probe 1 short circuit, upper compartment	Short circuit detected on sensor wires.	1. Sensor connection 2. Sensor 3. Control Board

What to do if a Power Interruption Occurs

Background

You may need to reset the oven if a power interruption occurs.

Procedure

To continue operation of the oven, do the following.

Step	Action
------	--------

1. For TH-300 ovens, set the power switch to the ON position.

The interface board (IB) software version displays.

The control board (CB) software version displays.

Power failure (PF) displays.

Continued on next page

Continued from previous page

2. **Touch** the power icon to clear the power failure (PF).

NOTE: For ovens equipped with a HACCP module, the control will display "PF", then the duration of the power failure.

TH-TS-011070

The display will go blank. **Touch** the power icon.

TH-TS-011073

The display will power up and the icons display.

TH-TS-011076

Result

Resume operation of the oven.

How to Change the Language Strip

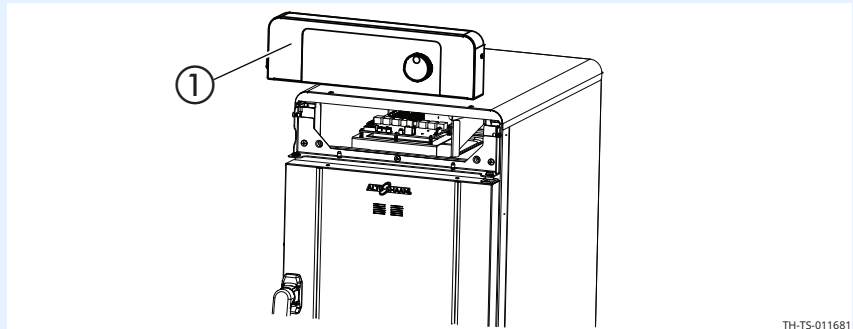

Before you begin

- The oven must be disconnected from electrical power.
- Make sure you have hand tools.

Procedure

To change the language strip, do the following.

Step	Action
1.	Remove the control panel ① from the oven.
2.	Remove the screws ② from the interface board (IB) cover.
3.	Remove the interface board cover ③.

Continued on next page

Continued from previous page

4. **Locate** the language strip ④.

5. **Remove** the language strip ⑤ from the control panel.
Install the new language strip ⑥ into the control panel.

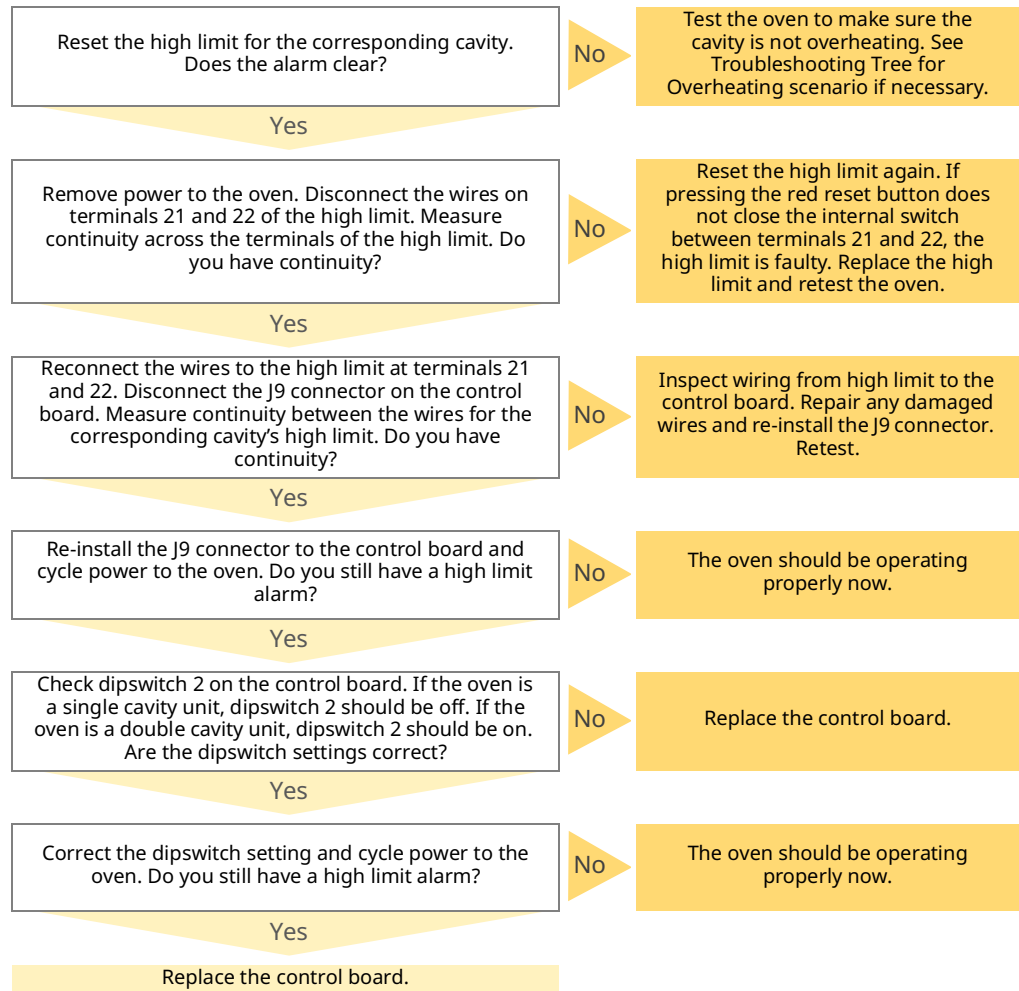

6. **Re-install** the interface board cover and screws.
7. **Re-install** the control panel.
8. **Re-connect** the oven to electrical power.

Result

The language strip has now been changed.

High Limit Alarm

The Oven does not Heat

WARNING: Electric shock and arc flash hazard.
Use caution when measuring line voltage.
Wear Personal Protective Equipment (PPE).

The Product Probe does not Work

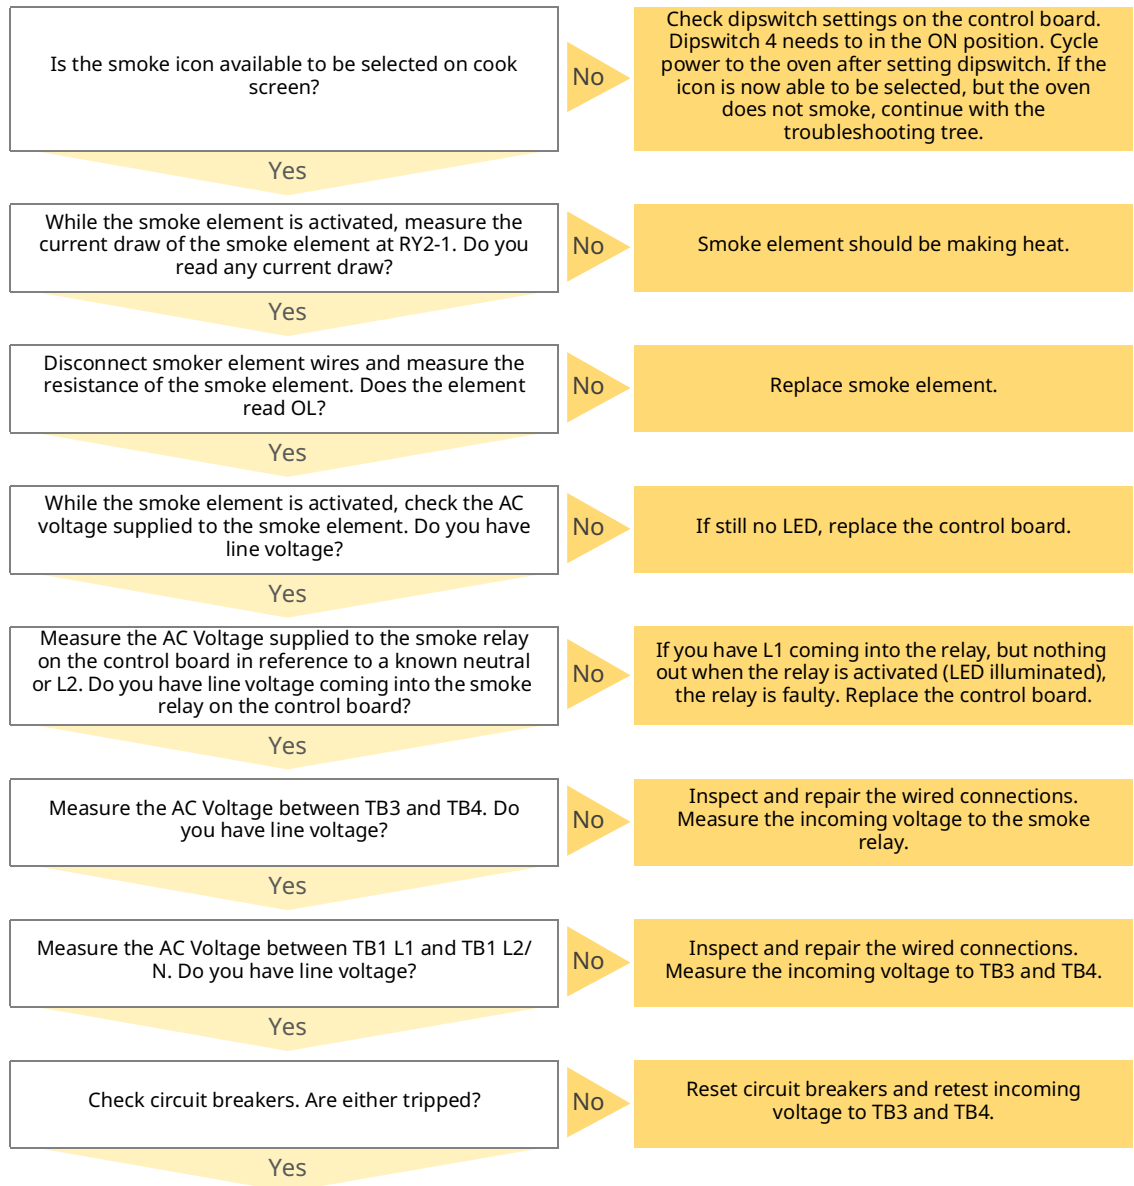

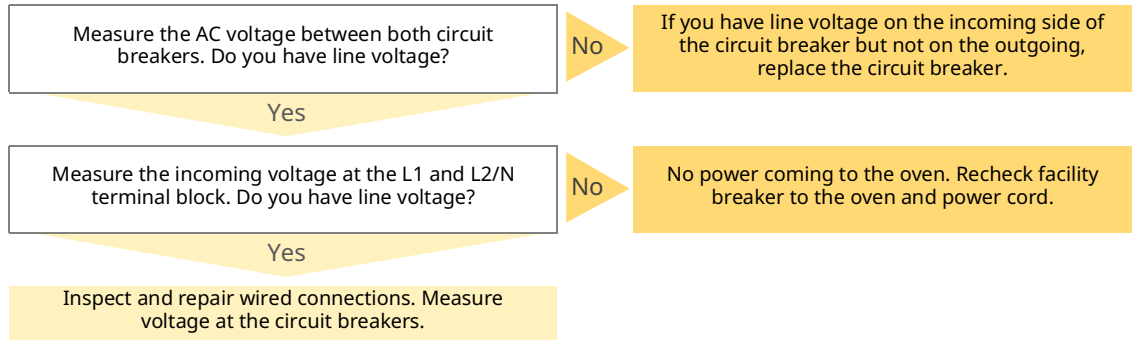

The Smoke Function does not Operate

WARNING: Electric shock and arc flash hazard.
 Use caution when measuring line voltage.
 Wear Personal Protective Equipment (PPE).

Before beginning, ensure DIP switch position 4 on the control board is in the ON position. Ensure jumper wires 610 / 611 and wires 612 / 613 are installed in connector J9 on the control board.

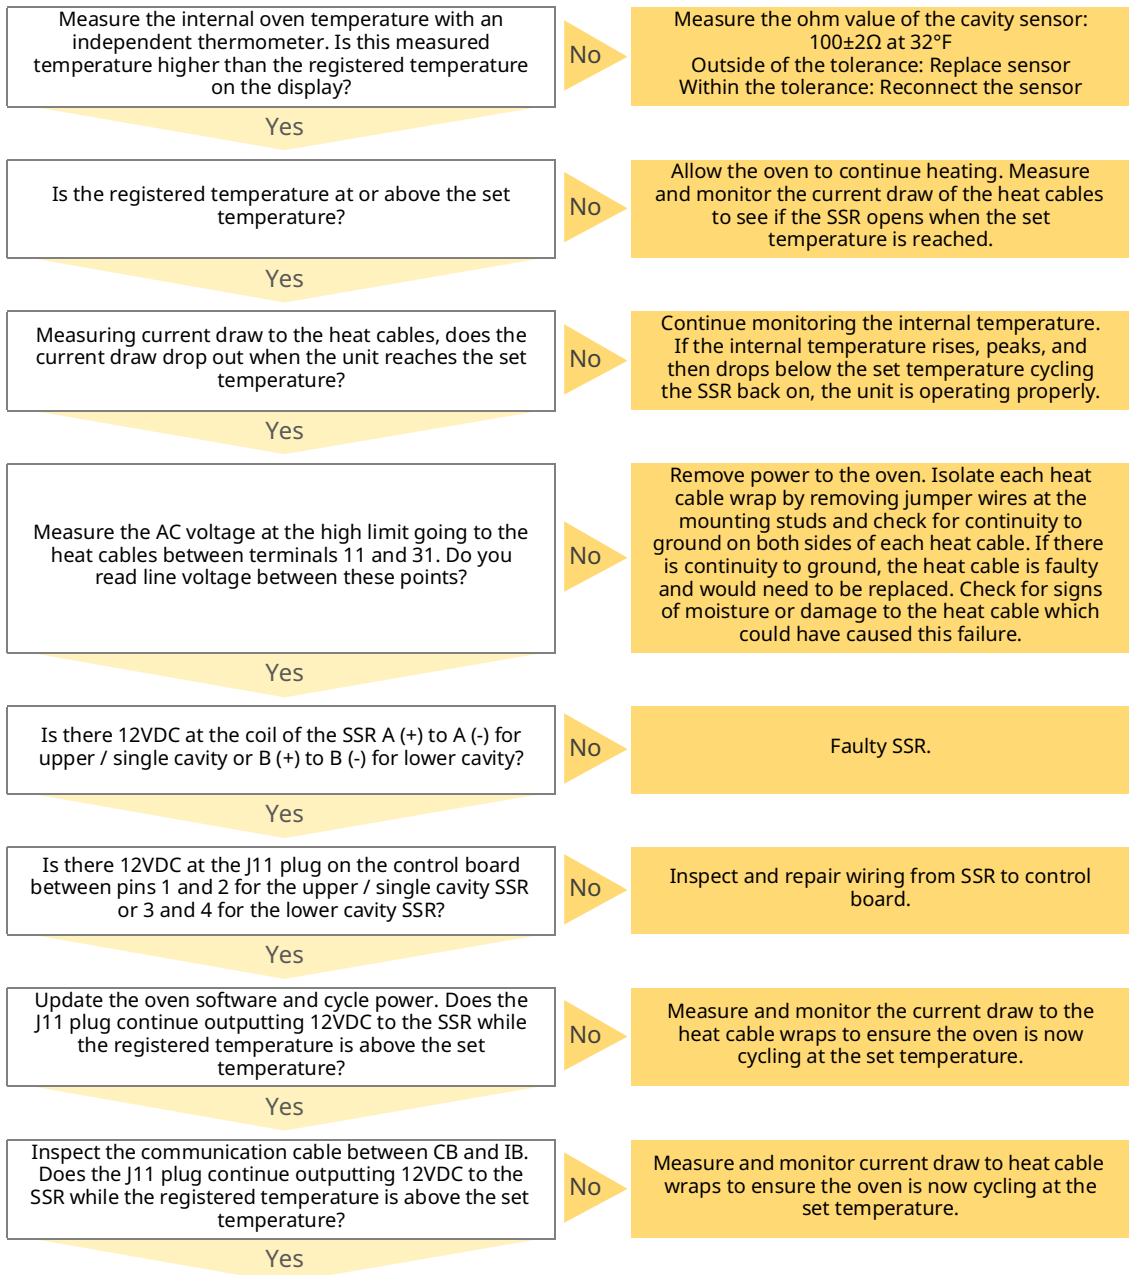

The Oven Overheats

WARNING: Electric shock and arc flash hazard.
Use caution when measuring line voltage.
Wear Personal Protective Equipment (PPE).
