Dimensions

Electrical terminal block

Strain relief provided at lower rear of machine. Adequate slack in the wiring should be provided to allow the machine to be moved for servicing.

W

Fresh water connection

3/4" female garden hose supply connection is provided. Supplied hose is 4' 7" (2616mm) in length.

D

Drain connection

Requires indirect connection to 2" (50mm) drain pipe (wall or floor). Supplied hose is 4' 7" (2616mm) long and should be cut to appropriate length at time of installation to allow machine to be repositioned for servicing.

Rack Clearances and Table Positioning

Dishtabling shown for dimensional purposes only. All dishtabling to be provided by others.

All dimensions from floor +/- 1/2" (13mm) due to adjustable feet.

Corner Installations

The DV 200.2 is field-convertible from straight-through to corner application in minutes, without additional parts.

Recommended Tabling Construction

Tabling Cutout for Corner Installations

If backsplash is higher than 2-1/2" (64mm), cut out as shown to clear door handle.

___ 208-230 V / 60Hz / 3 Ph

___ 460 V / 60 Hz / 3 Ph

Unit will have front mounted microcomputer controls, a 66 second total time cycle, and utilize 1.07 gallons (4.05 liters) fresh rinse water per cycle. Unit will have an automatic push-handle cycle start feature. Unit will utilize a fresh water pumped rinse for constant rinse pressure and temperature every cycle. Unit will have integral wash tank soil removal system to maintain clean wash water. Unit will have built-in temperature safeguards to guarantee final rinse temperature meets minimum 180°F (82°C) requirement. Wash pumps will be equipped with a soft start feature to reduce risk of chipped or broken ware. Unit will incorporate features to stop operation and turn off water fill valve if an internal leak is detected. Unit will have variable time cycles for heavier than normal soil loads.

"Auto Safe" Feature

The DV 200.2 guarantees that the minimum NSF 180°F (82°C) sanitizing final rinse temperature is achieved regardless of the incoming water temperature, even if connected to a cold water line, by automatically extending the wash cycle (if necessary) to provide additional heating time. Listed rack capacity assumes use of recommended 140°F (60°C) water supply. Exact rack capacity is dependent upon the incoming water temperature and on the electrical supply voltage.
